

Plotting and Data viz with R

Data visualization

good guide includes Claus Wilke's [Fundamentals of Data Visualization](#) and [associated code](#)

Reading in data

```
library(dplyr)
library(tidyverse)

tblr <- read.csv("data.csv", sep=",")

hist(tblr$V1)
```

tidyverse

Data framework in R called [tidyverse](#).

In particular visualizing data with [ggplot](#)

data loading

Using [readr](#)

data filtering

Using [dplyr](#)
